ENLIXO Tutor – QA Test Report

Can a tutor sign in and, with an active plan, do all of their work? · Run on 14 November 2026 at 09:59 (Sri Lanka time)

TEST CASES	PASSED	FAILED	PROBLEMS FIXED	UNIT ASSERTIONS
50	50	0	9	315 / 315

1. Result

Every test case passes. A tutor signs in with e-mail and password, the STARTER plan is active, every tutor page opens without errors, and the tutor can create a class, add a student to it and see that student in the class lists.

The first run passed 1 of 50 cases. The problems were fixed in the code (section 4) and the suite was run again until all 50 passed. The project's unit tests (`php tests/run.php`) also pass: 315 assertions, 0 failed.

2. How it was tested

Test tutor: created with the normal Add Tutor path (`PlatformBilling::addTutor`): STARTER plan, first month paid by bank (reference QA-TEST), account active. Script: `tests/e2e/setup-qa-tutor.php` .

Browser tests: Chromium through Playwright, real sign-in on the PHP server, 1440 × 900. Script: `tests/e2e/tutor-journey.e2e.js` . A case fails on its own check AND on any JavaScript error, any HTTP 5xx answer from the site or any PHP warning printed into a page or JSON answer.

Run again: `php tests/e2e/setup-qa-tutor.php` then `node tests/e2e/tutor-journey.e2e.js http://127.0.0.1:8082` and `node tests/e2e/make-report.js` .

3. Results by area

Area	Cases	Passed	Failed
Sign in	5	5	0
Security	2	2	0
Plan	3	3	0
Pages	23	23	0
Classes	13	13	0
Students	2	2	0
Language	1	1	0
Sign out	1	1	0

4. Problems found and fixed

#	Where	Problem	What was updated	Found by
1	**assets/js/script.js**	Sign-in, OTP and password pages threw JS errors (the header user menu and the skeleton list do not exist there), so the page script stopped.	The header menu is only wired when it exists; the skeleton toggle checks the elements first; the "Required elements not found" console error was removed.	TC-02, TC-03

2	**tutor/api/signInWithEmail.php**	A quote or SQL text typed in the e-mail field answered HTTP 500 (the e-mail went straight into the query).	Inputs are read safely and the e-mail is escaped once with Database::escape().	TC-05
3	**tutor/api/signInWithEmail.php, tutor/sign-in.php, tutor/index.php**	"Remember me" stored the plain password in a cookie and the sign-in pages filled it back into the form.	Remember me keeps only the e-mail; any old password cookie is deleted; the pages never read a password from a cookie and escape the e-mail they show.	TC-07
4	**tutor/api/signIn.php, tutor/api/sendOtp.php**	The WhatsApp number of OTP sign-in went into the query without escaping.	Both numbers are escaped with Database::escape().	Code review during QA
5	**9 tutor class pages (class-students, class-time-table, class-attendance, class-payments, class-payment-plans, class-pre-recordings, add-payment-plan, edit-payment-plan, add-registered-student-to-class)**	Opening a page without a valid class sent the tutor to ./class, which does not exist (HTTP 404).	They now go back to All Classes (./classes).	TC-17
6	**assets/js/fileChooser.js**	Pages that load the file chooser without a drop zone (Upload Student Bulk) threw "Cannot set properties of null (setting 'onclick')".	The drop zone events are wired only when its elements exist.	TC-19, TC-45
7	**tutor/class-payment-plans.php**	Two scripts declared applyValidation(), so the page script crashed on load.	The duplicate assets/js/functions.js include was removed (the tutor functions.js is kept).	TC-50
8	**src/Students/StudentRegistrar.php, tutor/api/addStudent.php**	Saving a new student failed with "Unknown column 'password'" on databases whose login_details table has no password column.	The password column is written only when the table has it (checked once per request).	TC-42
9	**tutor/message-center.php (+ assets/plugins/tom-select)**	Message Center loaded Tom Select from an unpinned CDN; when the CDN cannot be reached the page crashed with "TomSelect is not defined".	Tom Select 2.3.1 (Apache-2.0) is now served from the project's own assets folder.	TC-25

5. Found but not changed (recommendations)

Level	Where	Finding and recommendation
High	**tutor/api/sendOtp.php**	The WhatsApp Cloud API access token is written in the code. Move it to secure/.env (read through the config) and create a new token in Meta Business, because the old one is in the code history.
Medium	**tutor/api/signIn.php**	The OTP sign-in query does not filter on the Tutor role (the e-mail sign-in does). Add the role check so only tutor accounts can sign in there.
Low	**tutor/sign-in.php**	After a correct sign-in the page waits 3 seconds before opening the dashboard. 1 second (or none) feels faster.
Low	**tutor/sign-in.php**	The "Remember me" checkbox is inside a hidden block, so tutors cannot use it. Show it or remove it.

Low	**Side menu**	"Add Registered Student" opens without a class and now returns to All Classes. Better: start the page from a class (Class › Students › Add), or let the tutor pick the class on the page.
Info	**tutor/fees**	Student Fees still shows sample data (FeesMock) until the fees API is connected.
Info	**OTP sign-in**	WhatsApp OTP sign-in could not be tested here (graph.facebook.com is blocked in the test environment). Test it once on the live server.

6. All test cases

ID	Test case	Steps	Expected result	Result
TC-01	**Signed-out tutor cannot open the dashboard** Sign in	1. Open /tutor/dashboard without signing in	Sent to the sign-in page	PASS
TC-02	**Sign-in page opens** Sign in	1. Open /tutor/sign-in	E-mail, password and Sign In are shown	PASS
TC-03	**Empty sign-in is refused with messages** Sign in	1. Leave e-mail and password empty 2. Press Sign In	Both fields show what to fill in; still signed out	PASS
TC-04	**Wrong password is refused** Sign in	1. Enter the QA e-mail and a wrong password 2. Press Sign In	"Incorrect email or password"; still signed out	PASS
TC-05	**SQL in the e-mail field does not sign in or break the page** Security	1. Enter ' OR '1'='1 as the e-mail and any password 2. Press Sign In	A normal refusal, no server error, still signed out	PASS
TC-06	**Correct e-mail and password sign in** Sign in	1. Enter the QA tutor e-mail and password 2. Press Sign In	The dashboard opens with "Hello Qa Tutor"	PASS
TC-07	**"Remember me" never stores the password in a cookie** Security	1. Send the sign-in with rememberMe = true (the API the page uses) 2. Read the browser cookies	Only the e-mail is remembered; no cookie holds the password	PASS
TC-08	**The plan is active and its features are open** Plan	1. GET /api/v1/me/access	STARTER, not locked; class setup unlocked	PASS
TC-09	**My Subscription shows the active STARTER plan** Plan	1. Open Finance › My Subscription	Plan STARTER and status Active	PASS
TC-10	**Side menu shows the plan and the student limit** Plan	1. Look at the plan card in the side menu	"STARTER plan" and "of 150 students"	PASS
TC-11	**Dashboard opens without errors** Pages	1. Open /tutor/dashboard from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-12	**All Classes opens without errors** Pages	1. Open /tutor/classes from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-13	**Create a Class opens without errors** Pages	1. Open /tutor/create-class from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS

TC-14	**Registered Students opens without errors** Pages	1. Open /tutor/students from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-15	**Requested Students opens without errors** Pages	1. Open /tutor/requested-students from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-16	**Add New Student opens without errors** Pages	1. Open /tutor/add-student from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-17	**Add Registered Student opens without errors** Pages	1. Open /tutor/add-registered-student-to-class from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-18	**Upload Students Bulk opens without errors** Pages	1. Open /tutor/upload-student-bulk from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-19	**Time Table opens without errors** Pages	1. Open /tutor/time-table from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-20	**Class Recordings opens without errors** Pages	1. Open /tutor/recordings from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-21	**Attendance Dashboard opens without errors** Pages	1. Open /tutor/attendance-dashboard from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-22	**Mark Attendance opens without errors** Pages	1. Open /tutor/mark-attendance from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-23	**Student Fees opens without errors** Pages	1. Open /tutor/fees from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-24	**My Subscription opens without errors** Pages	1. Open /tutor/subscription from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-25	**Message Center opens without errors** Pages	1. Open /tutor/message-center from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-26	**Class Form settings opens without errors** Pages	1. Open /tutor/class-form-settings from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-27	**Student Form settings opens without errors** Pages	1. Open /tutor/student-form-settings from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-28	**Fees & Receipts settings opens without errors** Pages	1. Open /tutor/fee-settings from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-29	**Attendance settings opens without errors** Pages	1. Open /tutor/attendance-settings from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS

TC-30	**Recording Types opens without errors** Pages	1. Open /tutor/recording-types from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-31	**Integrations opens without errors** Pages	1. Open /tutor/intergrations from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-32	**My Profile opens without errors** Pages	1. Open /tutor/my-profile from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-33	**Plans & Billing opens without errors** Pages	1. Open /tutor/subscription?tab=plans from the side menu	Page loads (HTTP 200), no JS / PHP / server errors, not sent back to sign in	PASS
TC-40	**Create a class with the Create a Class form** Classes	1. Open Create a Class 2. Pick exam type, year, subject, medium, class type 3. Physical, monthly fee 2,500, due day 10 4. Press Create	Class saved and shown in All Classes Class #11	PASS
TC-41	**The new class opens its details page** Classes	1. Open the class from All Classes	Class name and summary are shown	PASS
TC-42	**Add a new student to the class** Students	1. Open Add New Student 2. Fill the required fields 3. Press Save Student	Student saved and listed in Registered Students Student #43	PASS
TC-43	**Registered Students lists the new student** Students	1. Open Registered Students 2. Search the student	The student is in the list	PASS
TC-44	**Class students list shows the student** Classes	1. Open the class › Students	The student is in the class list	PASS
TC-45	**Class time table page of the class opens** Classes	1. Open /tutor/class-time-table?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-46	**Class recordings page of the class opens** Classes	1. Open /tutor/class-recordings?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-47	**Class tutes page of the class opens** Classes	1. Open /tutor/class-tutes?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-48	**Class attendance page of the class opens** Classes	1. Open /tutor/class-attendance?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-49	**Class payments page of the class opens** Classes	1. Open /tutor/class-payments?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-50	**Class payment plans page of the class opens** Classes	1. Open /tutor/class-payment-plans?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-51	**Add Tute page of the class opens** Classes	1. Open /tutor/add-tute?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS

TC-52	**Add Recording page of the class opens** Classes	1. Open /tutor/add-recording?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-53	**Schedule a class day page of the class opens** Classes	1. Open /tutor/schedule-class?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-54	**Edit Class page of the class opens** Classes	1. Open /tutor/edit-class?class-id=<new class>	Page loads, no JS / PHP / server errors	PASS
TC-55	**Switching to Sinhala translates the menu, English brings it back** Language	1. Choose සිංහල in the language menu 2. Then English	Menu reads උපකරණ පුවරුව, then Dashboard	PASS
TC-56	**Sign out ends the session** Sign out	1. Press the sign-out button in the side menu	Sign-in page; the dashboard and the API are closed again	PASS
